

FOTL-12

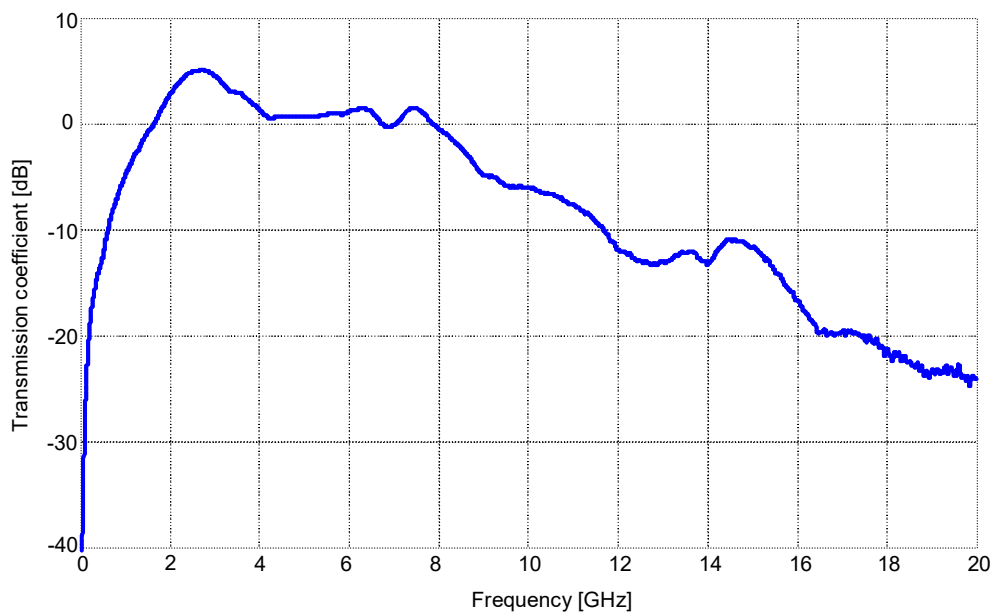

Fiber-optic transmission link

Main parameters:

- external optical intensity modulation in the frequency range of 0.1–12 GHz by means of electro-optic Mach-Zender modulator
- laser wavelength: 1550 ± 5 nm
- transmission coefficient: > -5 dB
- spurious free dynamic range: > 110 dB·Hz^{2/3}

Frequency characteristic

Output parameters versus input microwave signal power
